

31/07/2024 - SYDNEY PORT WEATHER DELAYS

Due to severe weather conditions in Port Botany, Sydney pilotage operations will be suspended. Sydney Port has been experiencing wind gusts up to 38 knots and wave heights above 8m exceeding safe working limits for vessel movements and pilot transfers. The situation is being monitored but for now please expect delays for the following vessels into Sydney:

Patricks Terminal:

CMA CGM Figaro v426S
OOCL Chicago v102S
OOCL Chicago v102S
Le Havre vMA422A

DPW Terminal:

TS Chennai v2404S
CMA CGM Baikal v229S
Maersk Fortaleza 428S
Oluf Maersk v426S

We kindly ask for your patience during this time and ask that you be aware this will create a bottleneck of container availability & slots for both import & export containers. If you have any questions, please do not hesitate to contact one of our friendly Tomax team members on 1300 186 629. Thank you.
